

Fossil Sharks of Florida

Carcharocles megalodon
C. auriculatus
C. angustidens
 White shark, *C. carcharias*
 Mackeral shark, *Otodus obliquus*
 Extinct Mako, *Isurus hastalis*
 Mako, *Isurus desori*
 Thresher, *Ipioides latidens*
 7-Gill, *Notorynchus primigenius*
 Nurse, *G. cirratum*
 Angel, *Squatina prima*
 Cookiecutter, *I. triturator*
 Sharpnosed, *R. terraenovae*
 Hammerhead, *Sphyna mokarrane*
 Sand tiger, *C. taurus*
 Hemipristis serra
 Dusky, *C. obscurus*
 Bull, *C. leucas*
 Spinner, *C. brevipinna*
 Lemon, *Negaprion eurybathrodon*
 Sandbar, *C. plumbeus*
 Silky, *C. falciformis*
 Tiger, *G. cuvier*
 Tiger, *G. aduncus*
 Tiger, *G. mayumbensis*
 Tiger, *G. eaglesomei*
 Extinct tiger, *Physogalrus contortus*

Requiem sharks, Family Carcharhinae

This family of sharks has 60 species and is one of the largest family of sharks. Most have triangular, blade-like upper teeth with small serrations. Lower teeth are spike-like with broad bases. Teeth are very similar among the different species, making it difficult to identify the species in this family group.
